Clarification: Attempts to obtain information prior to asking for explanations					

Comments:

TIME MANAGEMENT	PI	PD	P	I	U
Self Improvement: Uses time to improve athletic training skills and knowledge					
Socialization: Appropriately interacts during clinical experiences					

Comments:

**Towson University
Athletic Training Education Program
Sophomore Athletic Training Student Integrative Clinical Evaluation**

CLINICAL SKILLS AND PROFICIENCIES	PI	PD	P	I	U
Demonstrates compliance with OSHA standards relative to blood borne pathogens.					
Demonstrates successful skills in selecting and applying taping and wrapping techniques					
Demonstrates successful skills in obtaining anthropometrical measurements					
Demonstrates successful skills in applying selected therapeutic modalities					
Demonstrates successful skills in acute injury care for a musculoskeletal injury					
Demonstrates successful skills in obtaining, interpret, and recognize hazardous environmental situations and making appropriate recommendations for activities					
Demonstrates successful skills in the management of environmental conditions					
Demonstrates successful skills in selecting and fitting protective equipment					
Demonstrates successful skills in fabricating, applying, and removing custom made pads					
Demonstrates successful skills in applying soft, semi-rigid, and rigid splints					
Demonstrates successful skills in utilizing supportive and immobilization devices					
Demonstrates successful skills in implementing an emergency action plan and triaging					
Demonstrates successful skills in applying first aid techniques using universal precautions					
Demonstrates successful skills in stabilizing, transporting, and ambulating an injured patient					
Demonstrates the ability to obtain a complete and accurate medical history of a patient with emphasis on the lower extremity					
Demonstrates the ability to visually identify clinical signs and symptoms associated with common injuries, illnesses, and predisposing conditions to major body parts					
Demonstrates the ability to ascertain vital signs					
Demonstrates the ability to evaluate normal and abnormal posture					
Demonstrates the ability to identify body types					
Demonstrates the ability to recognize postural deviations and predisposing conditions					
Demonstrates the ability to apply inspection and observation evaluative techniques for the Lower extremity					
Demonstrates the ability to identify and palpate bony and soft tissue anatomical landmarks to determine normal or pathological tissues of the:					
Hip					
Knee					
Ankle/foot					
Spine					
Demonstrates the ability to administer appropriate active and passive range of motion tests for the:					
Hip					
Knee					
Ankle/foot					
Spine					
Demonstrates the ability to administer range of motion tests using goniometric techniques for the Lower extremity					
Demonstrates the ability to administer manual muscle tests for the:					
Hip					
Knee					
Ankle/foot					
Spine					
Demonstrates the ability to administer special tests to make a differential assessments for the:					
Hip					
Knee					
Ankle/foot					
Spine					
Demonstrate the ability to administer appropriate sensory, neurological, and circulatory tests for the Lower extremity					
Demonstrates the ability to administer functional and activity-specific tests for the Lower extremity					
Demonstrates the ability to perform a proper and complete clinical evaluation techniques for the Lower extremity					

CLINICAL SKILLS AND PROFICIENCIES	PI	PD	P	I	U
Demonstrates the ability to apply health care administrative techniques					
Demonstrates the ability to perform appropriate record keeping skills including initial and follow up evaluations utilizing a SOAP note format.
