PUBLIC PLANETARIUM SHOWS
Join us for a Journey Through the Universe, the Third Friday of Every Month, starting at 8 p.m.

A CLOSER LOOK
The Watson-King Planetarium at Towson University is open to the public on the third Friday of every month throughout the year. Each month’s presentation is different, and intended to have enough up-to-date information to intrigue the adults, and enough crazy graphics to delight the children. If the weather is clear, we will open our 16 inch telescope after the show, to see the stellar wonders up close and personal. Topics covered in the past include Black Holes, “What Was the Xmas Star?”, the Music of the Spheres, Pluto, and “The Stars Over Dineh Bikeyah.” A question and answer session with the presenter (a professional astronomer) is included. There is no charge and no tickets are required.

SERVICES/SOLUTIONS/OUTCOMES
• Equitable Education—The latest science is presented in an attractive energizing format free of charge
• Community Development—Planetarium shows allow the community to be a part of scientific progress
• Competitive Economy—Inspiring young minds to learn more about science will help provide a better educated and motivated workforce in the future
• Health and Wellbeing—Planetarium shows provide a unique insight into our place in space, and the necessity of maintaining healthy and sustainable lifestyles
• Arts and Culture—The natural world has always provided inspiration for the arts and inclusion of aspects of our culture is a large part of many planetarium shows
