

Online CompTIA CASP+ Certification Course

75 Hours / 6 Months

Course Description

From small businesses to large corporations, nearly every organization needs cybersecurity. With security being the fastest growing sector of the IT field, earning a CompTIA Advanced Security Practitioner (CASP) certification boosts your professional profile. This online CompTIA training course will prepare you for the CASP certification exam in a flexible, online environment.

Prerequisites

While there are no prerequisites to take this course, CompTIA recommends a minimum of ten years of experience in IT administration with at least five years of hands-on technical security experience.

What You Will Learn

- Recognize security risks and mitigation strategies
- Interpret scenarios to use network and security controls
- Analyze scenarios to utilize appropriate security assessment tools and procedures
- Identify methods to integrate information technology components into enterprise architecture
- Apply research, interactive, and security activities to achieve security goals
