Online Lean Six Sigma
Green Belt

50 Hours / 6 Months

Course Description
This course teaches Lean Six Sigma process improvement projects from start to finish. Green Belts can deliver measurable, sustainable improvement by finding the root causes of problems and streamlining processes. Your Green Belt Training course was developed to meet today’s changing business environments, and is facilitated by highly experienced and successful Lean Six Sigma Experts. This course draws on what our experts practice every day in the field to provide you with the most effective way to learn and implement Lean Six Sigma. The Lean Six Sigma Green Belt Certification requires that you complete your own real-world project and an exam to be successfully completed. Please see below regarding sourcing a project:

- Projects must be business-related. We recommend a project be completed at your place of employment.
- If you are not employed, a business-related project can be completed by finding a sponsor organization. We recommend finding a nonprofit organization to sponsor your project.
- We also encourage finding volunteer or internship opportunities. We have had a few learners complete successful projects by volunteering at their local churches, schools, and food banks, etc.

Upon completion of this course and required project, you will be prepared for the Lean Six Sigma Green Belt Certification exam.

Hardware Requirements
- This course can be taken on either a PC or Mac.

Software Requirements
- PC: Windows XP or later.
- Mac: OS X Snow Leopard 10.6 or later.
