Online Professional in Human Resources (PHR)® Dual Certification Course

120 Hours / 6 Months

Course Description
Towson University’s Professional in Human Resources Dual Certification course is an interactive, engaging course that prepares HR professionals for a more senior HR position. Our course is industry neutral, comprehensive, and covers employee and labor relations, business management, talent planning and acquisitions, total rewards, and learning and development. Completion of this course prepares students to take the aPHR®, PHR®, SPHR®, or SHRM-CP certification exams.

This course will focus on the five Functional Areas that are the focus of the PHR/SPHR exam

- **Business Management**
  Using information about the organization and business environment to reinforce expectations, influence decision making, and avoid risk.

- **Talent Planning and Acquisition**
  Identifying, attracting, and employing talent while following all federal laws related to the hiring process.

- **Learning and Development**
  Contributing to the organization’s learning and development activities by implementing and evaluating programs, providing internal consultation, and providing data.

- **Total Rewards**
  Implementing, promoting, and managing compensation and benefit programs in compliance with federal laws.

- **Employee and Labor Relations**
  Manage, monitor, and/or promote legally compliant programs and policies that affect the employee experience throughout the employee lifecycle.

Certification
Upon successful completion of this Human Resources Exam Prep (PHR/SPHR) course and the required professional HR experience, students will be prepared to sit for the HRCL certification exam to become a Professional in Human Resources (PHR®), a Senior Professional in Human Resources (SPHR®), or a Senior Professional in Human Resources Certified Professional (SHRM-CP).

<tr>
<th>FUNCTIONAL AREAS</th>
<th>TOPICS COVERED</th>
</tr>
</thead>
</table>
| **Business Management**                | • Interpret and apply information related to general business environment and industry best practices.  
                                           • Reinforce the organization’s core values, ethical and behavioral expectations through modeling, communication, and coaching.  
                                           • Understand the role of cross-functional stakeholders in the organization and establish relationships to influence decision-making.  
                                           • Recommend and implement best practices to mitigate risk (for example: lawsuits, internal/external threats).  
                                           • Determine the significance of data for recommending organizational strategies (for example: attrition rates, diversity in hiring, time to hire, time to fill, ROI, success of training).  
                                           • Change management theory, methods, and application Risk Management.  
                                           • Qualitative and quantitative methods and tools for analytics.  
                                           • Dealing with situations that are uncertain, unclear, or chaotic. |
| **Talent Planning and Acquisition**     | • Understand federal laws and organizational policies to adhere to legal and ethical requirements in hiring (for example: Title VII, nepotism, disparate impact, FLSA, independent contractors).  
                                           • Develop and implement sourcing methods and techniques (for example: employee referrals, diversity groups, and social media).  
                                           • Execute the talent acquisition lifecycle including interviews, extending offers, background checks, salary negotiation, etc.  
                                           • Applicable federal laws and regulations related to talent planning and acquisition activities.  
                                           • Planning concepts and terms (for example: succession planning, forecasting).  
                                           • Current market situation and talent pool availability.  
                                           • Staffing alternatives (for example: outsourcing, temporary employment).  
                                           • Interviewing and selection techniques, concepts, and terms.  
                                           • Applicant tracking systems and/or methods.  
                                           • Impact of total rewards on recruitment and retention.  
                                           • Candidate/employee testing processes and procedures.  
                                           • Verbal and written offers/contract techniques.  
                                           • New hire employee orientation processes and procedures.  
                                           • Internal workforce assessments such as: skills testing, workforce demographics, analysis.  
                                           • Transition techniques for corporate restructuring, mergers and acquisitions, due diligence processes, offshoring, and divestitures.  
                                           • Metrics to assess past and future staffing effectiveness including cost per hire, selection ratios, adverse impact, etc. |
| **Learning and Development**            | • Provide consultation to managers and employees on professional growth and development opportunities.  
                                           • Implement and evaluate career development and training programs such as career pathing, management training, mentorship, etc.  
                                           • Contribute to succession planning discussions with management by providing relevant data.  
                                           • Instructional design principles and processes (for example: needs analysis, process flow mapping).  
                                           • Techniques to assess training program effectiveness, including use of applicable metrics.  
                                           • Organizational development (OD) methods, motivation methods, and problem-solving techniques.  
                                           • Task/process analysis.  
                                           • Coaching and mentoring techniques. |
