Daniel Coit Gilman, Johns Hopkins University’s first president, inaugurated in 1876, stated in his installation address that Johns Hopkins University aims for “the encouragement of research…and the advancement of individual scholars, who by their excellence will advance the sciences they pursue and the society where they dwell.” This mission remains today and is summed up in one simple but powerful statement: “Knowledge for the world.” Johns Hopkins University is committed to educating their students and cultivating their capacity for lifelong learning, fostering independent and original research, and bringing the benefits of discovery to the world. After more than 130 years, Johns Hopkins remains a world leader in both teaching and research.

The Johns Hopkins Clinical Exercise Center specializes in “restoring health and preventing disease”. We are currently seeking motivated students who would like to gain valuable internship experience at a world renowned university. At the John Hopkins Clinical Exercise Center, you will receive extensive experience in exercise testing and prescription for special populations, including Phase II and Phase III Cardiac Rehabilitation patients as well as patients with Peripheral Artery Disease, Diabetes, and Congestive Heart Failure. Additional learning opportunities include ECG and blood pressure monitoring, lifestyle modification techniques, and metabolic stress testing. Students will also have the opportunity to observe echocardiograms, nuclear stress tests, research testing modalities, and/or coronary artery bypass grafting.

**Patient populations include:**
- Heart Disease
- Peripheral Artery Disease
- Pulmonary Disease
- Congestive Heart Failure
- Arthritis
- Diabetes
- Hip/Knee Replacement
- Pacemaker/Defibrillator
