2:00-3:15 PM

GEOG 473/673
Planning for
Resilient Communities

This course examines the risks and vulnerabilities in hazard-prone areas, focusing on strategies to build community resilience. It explores resilience as both a process and outcome, covering how communities prepare for, recover from, and adapt to adverse events.

DISASTERS
Are disasters natural?

Key topics include risk management, governance, and the social and political factors influencing disaster planning and recovery, with case studies on enhancing resilience to natural hazards and other shocks.
