RESEARCH POOL SIGN-UP INSTRUCTIONS

The Psychology Department uses a web-based sign-up system for research studies and alternate options (e.g. research colloquium and mock counseling experiences). This allows students to sign up for research activities on any computer that is connected to the Internet. The system will also keep a record of all the studies you have completed this semester.

In order to use the system, you must create a Research Pool account:

- Using any web browser, go to
- Click on Request Account
- Enter your name
- Enter the user ID that is the same as the username that is used for your @students.towson.edu email account (and the same user ID you use to register for classes)
- Student ID number and Phone number are not required; you may leave them blank
- Select the psychology course(s) you are taking this semester (be sure to select all of your psychology courses)

You will receive an email with your Research Pool username and password. Although the Research Pool system will allow you to select an alternative email address later, the first email will be sent to your @students.towson.edu email address.

If you have any questions about accessing your TU email account, contact the OTS Student Help Center: https://www.towson.edu/technology/studentservices/

If you have any questions about accessing your Research Pool account, contact the Research Pool coordinator at researchadmin@towson.edu

NOTE: If you do not receive a confirmation email within 48 hours of creating an account, you should try again. Make sure you are using the same TU username that is used for your @students.towson.edu email address.
