# MATH 331 [531] <br> Probability (4 units) <br> <br> Course Outline 

 <br> <br> Course Outline}

## Catalog Description

Probability in sample spaces, discrete and continuous random variables, distribution theory, Chebyshev's Theorem, Central Limit Theorem, expected values and moments.

Prerequisites: Math 275 or concurrently taking 275

Topics
Number of Weeks
Chapter 1: Axioms of Probability1.0
Chapter 2: Combinatorial Methods ..... 1.0
Chapter 3: Conditional Probability and Independence ..... 1.5
Chapter 4: Distribution Functions and Discrete Random Variables ..... 1.0
Chapter 5: Special Discrete Distributions ..... 1.5
Chapter 6: Continuous Random Variables ..... 1.0
Chapter 7: Special Continuous Distributions ..... 2.0
Chapter 8: Bivariate Distributions ..... 1.5
Chapter 9: Multivariate Distributions ..... 1.0
Chapter 11: Sums of independent Random Variables and Limit Theorems ..... 1.5
Exams ..... 1.0

Textbook: $\quad$ Fundamentals of Probability with Stochastic Processes, $3^{\text {rd }}$ Edition by Saeed Ghahramani

## Additional Requirements for Graduate Students:

Graduate students need to complete an additional project on a selected topic
