Exhibition | Encounter
11:00 a.m. to 4:00 p.m., Asian Art Gallery, Center for the Arts Room 2037
Myungsook Ryu Kim reveals a world of harmonious connections across cultures, art, and life. She brilliantly merges classical East Asian art and philosophy with media techniques of the West. Through a profusion of colors, textures, and dimensions, the works explore change and impermanence, illuminate the interdependence of heaven and earth and humans and nature, interpret experience and spirituality, embrace the juxtaposition of poetry and painting, and celebrate Korean history.

Exhibition | Even Our Oddkin
11:00 a.m. to 8:00 p.m., Center for the Arts Gallery, Center for the Arts Room 3040
This exhibition brings together artists who are curious about the lives unfolding all around us: not just those of humans, but the many beings, materials, and systems with whom we share the world. The phrase “more-than-human” reminds us that we are part of a vast web of animals, plants, microbes, machines, weather, chemicals and infrastructure. These artists imagine what it might mean to meet those presences halfway and to consider inner worlds we can’t fully know. They approach “nature” not as something distant or pure, but as it exists now: shaped by technology, politics, industry, and everyday life. As a result, familiar boundaries between nature and culture, human and machine, organic and manufactured begin to dissolve. Leaning into this complexity, the artists ask us to reconsider what kinship might mean today, and how we might live more thoughtfully within a world where even our oddest neighbors are part of the family. Guest curated by Lynn Tomlinson and Danielle d’Amico, Department of Electronic Media & Film.
