Creating a Portfolio Assignment

When Creating an Assignment...

1. In the settings when creating an assignment, scroll down to Grading.
2. Click the link that says Submission Details.
3. Change the assignment type to Portfolio Submission.
4. Select a portfolio template or students can create one when submitting the assignment.
5. Submit.

Please Note: When the student submits their portfolio, it only submits a snapshot of the student’s portfolio at the time of submission. If the student makes any changes to the portfolio after they submit it, the assignment submission will not be updated with the changes.
