Using the iOS App

Recording and viewing sessions in Panopto can also be achieved using the Panopto app on an iOS device. In this self-help document, you will be given a basic overview of how to use the iOS app.

**Downloading the Panopto App**

1. Open the iOS app store.

![App Store](image1)

*Figure 1*

2. To find the **Panopto** app in the app store, touch the **Search** button at the bottom of the screen.

![Search](image2)

*Figure 2*

3. Type **Panopto** in the search field and then touch **Panopto** in the search results.

*Figure 4*

5. Touch the **INSTALL** button and follow the on-screen prompts. Enter your app store password if requested.
**Logging In**

Once you have downloaded the app and launched it, you will need to log in with your Blackboard credentials.

1. Touch the **Panopto** icon to open the app.

**Figure 16**
3. The **Create and upload** page will display. Under the **Create a new recording in**: section, select the folder in which you wish to record. If the folder you are looking for is not displayed, tap the **Browse** button.

4. The **Record** screen will appear. In the **Title** box, give your session a name.

5. Tap **Start Recording** if you want to capture a new video. Otherwise, select **Choose a video** to select a video from your camera roll.

6. Once finished, you will be asked to upload the video to the Panopto Server. Tap the **Upload** button. Your video will be uploaded to the Panopto server and viewable like other recordings.

7. You will be returned to the **Create and Upload** screen. Your recording will appear in the ** Uploaded** section.
