tu-secure for Mac PC

tu-secure wireless (Mac OS 10.5 or Above)

Introduction

These instructions are for configuring a Mac laptop running Mac OS X 10.5 Leopard or above to connect to Towson's Secure Wireless connection. **tu-secure** provides the most secure and stable connection to the Towson network and allow access to TU resources like your H: and O: drive.

If you need additional assistance, please contact the Help Center at 410-704-5151.

Note: Mac OS 10.4 Tiger is no longer supported by Apple or the University. Macs that are running Tiger may or may not work by using the settings below.

Basic Instructions

To connect to the **tu-secure** network complete the following steps:

1. Click on the **Wi-Fi** icon in the **Menulet** section of the **Title Bar** at the top right side of the screen.

Figure 1

2. Select **tu-secure** from the list of available wireless networks,

Figure 2

3. You will be prompted for a **Username** and **Password**. Enter your **NetID** and password.

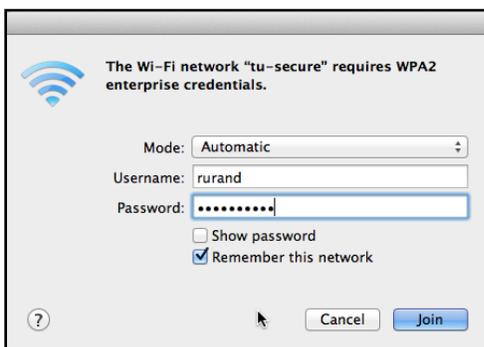

Figure 3

4. Click the **Join** button.

5. If a **Verify Certificate** window appears, click **OK**.
