Preview Your Website as a Mobile Website

Using Google Chrome to View Your Website as it Would Appear on a Mobile Device

To test your websites functionality on mobile devices try using Google Chrome’s mobile preview within the browser’s built in developer tools. Simply do the following:

1. Click “Customize and Control Google Chrome” in the upper right corner of the browser

2. Select “More Tools”

3. Select “Developer Tools”
4. The left panel of your screen now shows options for viewing your webpage within different mobile environments. Click the drop down to view it on a selection of different mobile devices. NOTE: The top viewed mobile devices for our website are currently iPhone 6, iPhone 5, iPhone 6 Plus and an iPad.
5. To exit this view simply press the “X” in the left corner of the browser window.
