

Panopto Policies

Accessing the Panopto System

User Accounts

- All Towson University faculty, staff, and students will have access to Panopto. Their account will be created the first time they log into Panopto or access Panopto content through Blackboard.
- Faculty, staff, and students will use their Towson NetIDs to access Panopto.
- Guest accounts are not necessary for Panopto, as sharing settings allows videos to be viewable by non-TU users.

Panopto Folders

Creation through Blackboard

- Instructors can create folders for their Blackboard course through the Blackboard/Panopto integration.
- Folders created through Blackboard will carry the same name as the Blackboard course.
- Instructors can reuse videos from an old folder by creating a copy in the new course's folder.
- Access to a Panopto folder created through Blackboard is based off the Blackboard enrollments. Instructors and Teaching Assistants will be listed as creators on the folders, and Students will be listed as viewers.

Creation through Panopto

- Users can request folders be created for departmental or project needs. These requests are sent to the Blackboard/Panopto team on campus and the folder is created.
- The user who requests the folder will be the contact for the folder and will be in charge of controlling access to the folder.

My Folder and Everything Folder

- Each user has their own space on Panopto called "My Folder". This area is similar to their OneDrive through Microsoft.
- The "My Folder" area cannot be shared. Individual videos can be shared with users, but only the user who owns the folder can have access to the entire folder.
- The "Everything" folder lists all videos on the system that a user's account has access to. This does not mean that they will see all videos on the system. If a video is listed in the "Everything" folder for a user, it means that either they created the video, they are enrolled in a folder where the video is located, or the video was made public to all TU account holders.

Video Retention

- Video retention will be based on a video's last access date, not the recording date.
- Videos will be listed as unavailable after 2 years, archived after 3 years, and deleted after 4 years. If a video is listed as unavailable, the owner of the video and the administrators will still be able to search for, locate, and watch the video. If a video is archived, the owner or an administrator will need to restore the video prior to being watched.
- If the video is watched during the yearlong period between being made unavailable and archival, the video retention policy will be reset and the 2 year period from last access begins again. If a video is restored, the video retention policy will be reset and the 2 year period from last access begins again.
- This retention policy applies to all recorded Zoom lectures/meetings that have been automatically uploaded to Panopto.

Video Access Requests

- When a user requests access to a video without an owner, the access request is sent to Panopto administrators.
- At this time, the administrator will go into Blackboard and attempt to locate the course and video. Once located, a ticket will be created for the instructor with the requesting student(s) added to the CC line for the ticket.
- The ticket will contain instructions on how to make the video available to students.

Reusing Content

- Faculty and staff who intend to use instructional lecture capture resources supported by Towson University are to adhere to the [Instructional Lecture Capture Guidelines](#) to ensure the FERPA regulations are not violated.
- If a faculty/staff member intends to reuse recordings where the image, voice or materials of students are captured, the [Instructional Lecture Capture Release Form](#) must be used.
